SUMMARY

Dynamic Software Engineer with 1.5 years of experience designing scalable web applications, optimizing backend performance, and implementing user-centric designs. Proficient in React.js, MongoDB, Express.js, and Python. Skilled in delivering projects with measurable impact.

EXPERIENCE

(08/2023 - 07/2024) - Freelance

Software Engineer - MERN STACK

- Diagnosed and resolved application errors, ensuring optimal functionality and performance.
- Developed custom web applications using React.js, MongoDB, and Express.js, increasing project delivery efficiency by 20%.
- Improved client retention rates by 30% by delivering user-centric designs and scalable solutions.
- Built and optimized RESTful APIs, reducing server response times by 25%.
- Integrated role-based user authentication systems, enhancing application security by 50%.

(10/2022 - 07/2023) - Uni Projects

Python Developer

- Built a desktop sentiment analysis application, increasing sentiment accuracy by 40% using AI algorithms.
- Designed and implemented a price prediction tool for laptops, achieving 85% prediction accuracy.
- Worked with following Tech Stack during the Period: Python, MySQL, Python, Django and Git.

(2021 - 2022) - Fiverr - Freelance

Web Developer

- Delivered responsive, interactive websites tailored to client specifications, achieving a 100% satisfaction rate.
- Debugged complex front-end issues, improving website performance by 20%.

ACTIVITIES

HCS Tech Team Member - CS Dep.

Was a member of Technical Team of our Computer Science Society.

CERTIFICATES

The Full Stack (Developer)

Full Stack Web Development Course from Meta through Coursera

IT Literacy

Computer Networks, Windows Operating System and Office

Networking from Cisco - Get Connected

Networking Course provided by Cisco about Computer Networks

EDUCATION

2020 - 2024

BS Computer Science

University of Gujrat - Punjab, Pakistan.

CGPA: 3.2/4.0

PROGRAMMING SKILL

Frontend:

HTML, CSS & JAVASCRIPT

REACT JS

Backend:

EXPRESS & MONGODB

DJANGO

Other:

Python, Github, JAVA, OOP, Redux, Tailwind, C++,SQL

ACADEMIC PROJECTS

Uni-Connect - A MERN STACK App as FYP

- Built a digital event organizing and ticketing platform that improved event management efficiency by 40%.
- Key Features: Role-based user authentication, event scheduling, ticket generation.
- Technologies: React.js, MongoDB, Next.js, TypeScript.

Music Playlist Web App

- Created a web-based music player with advanced playlist management functionality, increasing user engagement by 25%.
- Technologies: React.js, JavaScript.

Password Manager (React.js)

- Developed a secure password storage application with robust validation and authentication, improving user data safety.
- Technologies: React.js, Express.js, MongoDB.

Hotel Managemnet System - C++

- A management system to manage data of rooms and customers in hotel.
- This project had options like book room for customer, edit customers info, edit room status if customer checks out etc.
