## SUMMARY

Software Engineer with experience of developing and debugging applications, building and optimizing backend, using redis and deployment on azure . Proficient in React.js, MongoDB, Express.js, and Python. Skilled in delivering projects with measurable impact.

## EXPERIENCE

(02/2025 - Present) - Shahtez Softwares, PVT Ltd

Software Engineer

- Developing and optimizing web applications using React.js, Express.js, and Node.js.
- Implementing JWT-based authentication for secure user management.
- Managing Redis for in-memory storage, caching, and performance optimization.
- Deploying applications on Microsoft Azure, ensuring scalability and reliability.
- Building APIs and Enhancing API response times through caching strategies and performance tuning.

(01/2024 - 11/2024) - Freelance

Software Engineer - MERN STACK

- Diagnosed and resolved application errors, ensuring optimal functionality and performance.
- Developed custom web applications using React.js, MongoDB, and Express.js, increasing project delivery efficiency by 20%.
- Built and optimized RESTful APIs, reducing server response times by 10%.
- Integrated role-based user authentication systems, enhancing application security by 25%.

(10/2022 - 07/2023) - Uni Projects

Python Developer

- Designed and implemented a price prediction tool for laptops, achieving 85% prediction accuracy.
- Worked with following Tech Stack during the Period: Python, MySQL, Python, Django and Git.

## ACTIVITIES

HCS Tech Team Member - CS Dep.

Was a member of Technical Team of our Computer Science Society.

## CERTIFICATES

The Full Stack (Developer)

Full Stack Web Development Course from Meta through Coursera

IT Literacy

Computer Networks, Windows Operating System and Office

Networking from Cisco - Get Connected

Networking Course provided by Cisco about Computer Networks

## EDUCATION

Bachelor :

2020 - 2024

BS Computer Science

University of Gujrat - Punjab, Pakistan.

CGPA: 3.2/4.0

Intermediate / 12th:

2018 - 2020

Pre-Engineering at RNC Kharian

## PROGRAMMING SKILL

Frontend:

HTML, CSS & JAVASCRIPT

REACT JS & NEXT JS

Backend:

EXPRESS & TYPESCRIPT

Microsoft Azure & Redis

Other:

MongoDB, Github, Python, JAVA, OOP, Redux, Tailwind

## ACADEMIC PROJECTS

Uni-Connect - A MERN STACK App as FYP || [Link](#)

- Built a digital event organizing and ticketing platform that improved event management efficiency by 40%.
- Key Features: Role-based user authentication, event scheduling, ticket generation.
- Technologies: React.js, MongoDB, Next.js, TypeScript.

Music Playlist Web App || [Link](#)

- Created a web-based music player with advanced playlist management functionality, increasing user engagement by 25%.
- Technologies: React.js, JavaScript.

Total Safety || A Web App Frontend in Reactjs || [Link](#)

- This project is the frontend implementation for Total Safety, built using ReactJS and TailwindCSS. It provides a professional and responsive user interface for the company
- Features: Responsive Design, Reusable Components, Dynamic Pages, Consistent Styling

Auto Links Saver || Auto Tab Opener (Chrome Extension) || [Link](#)

- The Link Saver Extension is designed to help users save, manage, and open their favorite links effortlessly.
- Save and manage links directly from the extension popup.
- Choose links to open automatically on Chrome startup.
- All saved links are stored locally on your computer and are not sent to any external server.
